

We are experts in temporary and modular building structures. Teamed with local EMS, and medical professionals, ModTruss has developed solutions to the cross-contamination epidemic that is occurring in and throughout our country. In response, we've created a Bio Containment Unit (BCU) to host COVID-19 individuals as well as a Common Area Barrier (CAB) to separate patients from each other while they are on site in close proximity. Furthermore, our nation-wide dealer network is poised and ready to build temporary exterior structures to augment the overflowing volume of individuals needing care.

Features and Benefits of the **Common Area Barrier (CAB)**

- Barrier to stop further cross contamination spread of COVID-19
 - Applicable in waiting rooms and bedside barriers to divide patients in triage centers
- Fire retardant easy clean surfaces to remove contaminations
- 15-minute build time; no tools required
- Sizes can be modified with simple tools
- Pricing: 10mm units: Waiting Room Application 4'x4'x6'
 - Single module: \$485, expansion module: \$325, Set of 5 modules \$1,749
- Pricing: 16mm units:
 - Waiting Room Application 4'x4'x6'
 - Single module: \$635, expansion module: \$425, Set of 5 modules \$2,265
 - Hospital Bedside Application 8'x8'x7'
 - Single module: \$1,355, expansion module: \$940, Set of 5 modules \$4,960

Features and Benefits of the **Bio Containment Units (BCU)**

- Isolate COVID-19 patients
 - Enclosed negative-pressure environment, prevents further contamination and recirculates air 12/hour
 - Qty (2) .3-micron filters; keeps clean air clean, and contaminated air, contained
 - 8' inner working cube – allows for a hospital bed and staff
 - Clear roof to allow LED provided lighting in
 - Double zipper entrance to accommodate additional donning/doffing rooms
- Easy clean surfaces to remove contaminations
- 1-hour build time w/2 technicians
- \$20,000 for first unit, each additional unit is \$18,000 because of shared support beams

Features and Benefits of the ModTruss **Exterior Structures**

- Professional Engineer stamped for up to 100+ mph sustained wind and seismic rating
- Standard sizes, each accommodates Qty (8) BCUs or Qty (10) CABs for bedside use
- Can be heated and/or cooled to provide controlled environment
- Waterproof vinyl floor, egress doors and ADA compliant ramps, Qty (3) ABC fire extinguishers
- \$25,000/structure, 3-day onsite assembly
- \$199,000 for material only, not including electrical or HVAC

We are here to not only help our nation cope with COVID -19, but we are here to help get ahead of it. Please allow us and our vast dealer network to do so. Production is working overtime to support demand, all material ships from central Wisconsin. Sales Tax and Freight are not included in the above prices - payment due upon ordering.
